Hinged Door Frame in American Walnut Veneer

# About Us

LR Custom lives by our commitment to reliability, creativity, and the high standards of our customers.

We work tirelessly to take your idea and make it a reality: from design to installation we pride ourselves on beautiful woodwork that fits perfectly with your aesthetic and looks totally at home in your space.

## HIGH-END DOOR SYSTEMS

LR Custom offers high-end door systems crafted with innovative panels engineered for acoustic and thermal insulation.

LR Custom materials improve acoustic comfort by controlling reverberation, reducing outside noise, and balancing how sound moves through a space. The result is a healthier, calmer, and more comfortable living environment.

High-End Door Systems

**BEAUTY,  
CARVED  
FROM  
WOOD**

**Sliding Door Frame in Laminate (left)**

**Flush-to-Wall Door Frame in Matte Lacquered Cream (right)**

LR Custom's sophisticated doors are designed with precise craftsmanship and thoughtful detailing.

Each door features high-quality concealed hinges and integral drop-down seals to reduce the passage of sound waves and enhance acoustic comfort.

Alongside the classic smooth door, the collection includes engraved and slatted options with inserts and digital prints. These models provide a strong foundation for customization, allowing each client to tailor the design to their space.

## SOUND INSULATION

LR Custom doors combine refined design with built-in sound insulation for quieter, more comfortable interiors.

Efficient acoustic and thermal insulation maintains indoor temperature stability and limits noise from outside or neighboring areas, supporting a sense of thermo-hygrometric comfort.

Acoustic and thermal performance share the same insulating properties, resulting in a quieter, more temperature-stable interior. Greater door thickness amplifies both benefits, improving overall comfort and control.

Breeze Oak

## SOUND ABSORPTION

Sound-insulating materials stop noise from traveling into nearby spaces, while sound-absorbing materials keep it contained and prevent it from bouncing off the walls. Beyond traditional soundproof models, LR Custom doors also include sound-absorbing options with thousands of micro-perforations that capture sound waves, reduce echo, and create a more comfortable acoustic environment.

## HANDLES

LR Custom doors are designed with close attention to every element, right down to the hardware. Handles are not chosen at random—they're intentionally paired with the correct locks and hinges to ensure visual harmony and smooth performance. The result is hardware that feels solid, lasts over time, and supports everyday use. Customers can also personalize their doors, with a broad selection of shapes, finishes, and design options to match any interior style.

## HINGES

Resistance and versatility are essential for a door's movement and overall performance. LR Custom uses high-quality concealed hinges that bring together efficiency, elegance, and thoughtful engineering. They can be installed on any type of frame and come in a wide selection of finishes. Completely hidden from view, these hinges allow for silent, smooth opening and closing, enhancing the clean design of the door.

Applicable Finishes:

Blending materials is difficult and doing it seamlessly is even harder. At LR Custom that's our focus: combining different materials to create beautiful millwork.

**THE DOOR IS  
YOURS.  
ANY COLOR.  
ANY STYLE.  
ANY DESIGN.**

From project management to build, we'll respect your building's style needs and make sure it stands out, whether it's a residential or commercial space.

It's hard work. But at LR Custom we don't shy away from a challenge, we welcome it. We push ourselves to perfection and you'll see that in our work.
